

Coronavirus Disease 2019 (COVID-19)

Better Fitting Masks

No sound. Silent video.

Masks work best when everyone wears them.

But not all masks provide the same protection.

When choosing a mask, look at

How well it fits

How well it filters the air

How many layers it has

For your mask to work the best it can

Make sure it fits snugly against your face

And has layers to keep your respiratory droplets in and others out

You can improve how well your mask works by

Choosing a mask with a nose wire

Using a fitter or brace over a disposable mask or a cloth mask

When wearing a disposable mask,

Knot the ear loops

and tuck in the sides

When wearing a mask, DON'T

Combine two disposable masks

Combine a KN95 mask with any other mask

Wearing a mask consistently and correctly is important to help slow the spread of COVID-19.

And remember... Masks work best when everyone wears them.
